

**Know-how in stone processing!
Made in Germany**

FC Antiquing Machines

FC Antiquing Machines

for different products such as paves, slabs, wall stones or hollowblocks we produce product coordinated machines. From beginner machines to full automatic lines.

We offer machines for different speeds and antiquing effects (soft/hard). The machines are placed inline or as bypass to treat products from the drying chamber or outline to treat products from the stock.

With the different machines we can create every favoured antiquing effect.

FC Rustico

antiquing machine with hammer-technology for light to rough edge breakage

with high speed

different antiquing tools for optimal results.

Also suitable for bushhammering.

Patented technology.

FC Hardliner

antiquing machine with molding technology without touching the surface,

only treatment of the edges

machine can be used also for large-sized

and thin products.

Patented technology.

FC Softliner

antiquing machine for paves to create a soft edge breakage with smoothing of the surface.

FC Rustico Wall

antiquing machine for wall-stones with light to rough edge breakage with high speed and optionally treatment of the visible surface.

FC Softliner Wall

antiquing machine for wall-stones to create a soft edge breakage with smoothing of the surface. Treatments of hollow blocks possible.

Brushing support

optionally equipment for the highest level of stone processing to clean and smooth the surface with new developed brushes.

Produktionsprogramm

Maschinen für Pflastersteine

FC-Veredelungslinie mit
Strahlmaschine
Facelift Bürstenmaschine
Verschiedene Alterungsmaschinen
Softline / Hardline / Rustico
Beschichtung – UV-Lack
Imprägnieren
Auswaschanlagen Naßseite
Einölstation für Bretter

Maschinen für Platten

Fasen-, Rundkanten
Bürstenmaschine Facelift
Strahlmaschine
Imprägnieren – UV-Lack
Softline Antiker
Kalibrieren
Schleifen
Farbmarmorierung
Sägemaschinen

Maschinen für Mauersteine

Spaltanlagen
Rustico Wall Mauerstein-Antiker
Softline Mauerstein-Antiker
Kalibriermaschine Ecoplane

Handling

Umsetzer
Steinzangen 4/2 Seiten
Roboter
Rollen-, Gurt-, Plattenbänder
Freihubförderer
Verpackung

Maschinen für die Wet-Cast Fertigung von Platten, Stufen und anderen linearen Elementen.
Wir fertigen Ihre Sondermaschinen nach Ihren Vorgaben und Wünschen.

production programme

machines for paves

FC Finishing line consisting of
shotblasting,
Facelift brushing
Rustico machine tumbling,
coating – UV paint
impregnation
direct washing on wet side
oiling station

machines for slabs

chamfering and bull nose
Facelift brushing machine
shotblasting
impregnation – coating UV paint
Softline antiquing
calibration
grinding – polishing
colour device for marble effect
cutting machines

machines for wall stones / blocks

splitting machines
Rustico wall antiquing / tumbling
Softline antiquing
Ecoplane calibrating machine

Handling

automatic cuber
2/4 side clamps
cubing robot
roller-, belt-, slat conveyors
walking beams
packing

Machines for wet cast production of slabs, steps and other linear elements.
Custom made machines based on your specifications and requirements.
